## **To the participants of the 2nd Eurasian Conference and Symposium RISK – 2020**

On behalf of the Russian Scientific Society for Risk Analysis we welcome the participants of the II Eurasian Conference and Symposium RISK-2020 taking place on the historical land of Georgia in its capital Tbilisi.

National and international scientific societies and associations studying the conditions of formation and realization of risks in social, natural and technological domains seek to reduce risks of social crisis, natural disasters, industrial accidents and catastrophes. They are involved in the implementation of the UN Sendai Framework for Disaster Risk Reduction. The II Eurasian Conference and Symposium RISK-2020 will undoubtedly contribute to the implementation of this UN program both at the national and international levels.

We wish the participants of the II Eurasian Conference and Symposium RISK-2020 a successful work, interesting scientific discussions and fruitful debates on practically important problems related to ensuring safety of people, technosphere and natural environment as well as to establishing and strengthening friendly contacts between specialists from different countries.

President of the Russian Scientific Society for Risk Analysis,  
Member Correspondent of the Russian Academy of Sciences

N.A. Makhutov

Chairman of the Scientific Council of the  
Russian Scientific Society for Risk Analysis  
Doctor of Technical Sciences, Professor

V.V. Lesnykh
